

A Lawyers 'Business'

Author : F.William Houraney

Date : April 22, 2014

Like most people, lawyers are in business to make money. The differences however represent the very cancer that has been metastasizing for decades and if not stopped, will destroy America.

First, it doesn't matter how they make their money as long as it ends up in their pocket. Lying, cheating, stealing, manipulating stupid people outside and inside the courtroom. The list of their unethical and inhumane ways of achieving success is disgraceful. GLOOG only touches the surface with it's many articles on this.

[The Lawyer Rackets](#)

The Lawyer Rackets

Secondly, they're the only business in the world that can actually create their own revenue streams and then force everyone to contribute to it! That's right. In case you're wondering and/or just not paying attention as your pocket is picked, lawyers make the laws and then make money off of both breaking them and enforcing them! Get it? The more laws they make, the more revenue streams and the more wealthy they get. Pretty simple actually. It doesn't take a rocket scientist to know why then there are literally millions of laws on the books in America. In 2010 alone, there were 40,627 new laws that went into effect throughout the nation!

America has too many laws, and the laws we do have are tedious, overly complex and sometimes not only impossible to understand, but impossible to comply with.

So if you are you looking for an exact number you're not going to find it anywhere. My guess? A couple of million or more. Everything we do is governed even though we're supposed to be the "land of the free" [read more...](#)

Third, it doesn't matter who they make their money from. Unemployed, bankrupt, handicapped, religious, charitable, etc. There are no discounts on their overinflated hourly charges. Why even declaring bankruptcy you must have enough money saved, not to feed your family, but to pay the lawyer's fee UP FRONT! Yes, they made it a law that the bankruptcy lawyer's fee must be paid before he can/will represent you!!

The best example of the ways lawyers generate revenue and do business is this little known disgraceful fact:

**... the contemporary assault on Christianity began with a little noticed brochure from the American Bar Association in May 1989 advertising a seminar for "... attorneys who want to be on the leading edge of an explosive Area of law" — suing churches, Christian leaders and Christian activists. The seminar was entitled: "Expanding use of tort law against religions."

Fourth, They have created the biggest racket in history with the 'Class Action Lawsuit Industry.' There are so many examples of lawyer lies and manipulation in this racket that it's given a whole new meaning to the word GREED! Thousands of legitimate hard working American businesses have been closed down after facing this extortion racket. As mentioned, [Capone](#) was a boyscout compared to this [Scum of America](#).

THE
\$40 BILLION
SCAM

Finally, the lawyers best revenue scam is politics. By dominating the political scene both State and Federal, they have total control over everything and a free hand to not only create all the laws/revenue streams they choose to, BUT they also have the power to spend YOUR MONEY rather you like it or not!

The latest example of the total lack of business mentality and how they have no regard for YOUR money:

Solyndra Sequel: 'We're Back in Business' with \$4 Billion Energy Loans

On Wednesday, the U.S. Energy Department announced it will begin doling out \$4 billion in taxpayer-funded loan aid to renewable energy companies.

"We're back in business," Peter Davidson, executive director of the department's loan programs office, told Reuters. "We really want to go back to ... doing very valuable work for our economy going forward."

Obama's controversial DOE green energy loan program sparked a firestorm when Government Accountability Institute (GAI) President Peter Schweizer revealed that 80% of all \$20.5 billion in DOE loans were given to Obama's top campaign donors. In his New York Times bestseller *Throw Them All Out*, Schweizer called the Obama green energy loan slush fund "the greatest--and most expensive--example of crony capitalism in American history." - The Lawyer in Chief : Lies, Lies and More Lies: And America is the Naive Jury... -

This gigantic '[800 Pound Elephant](#)' in this room that no one calls out is known as "taxes." Yes, they use your money as they like and most of the time it is indeed their friends and themselves that end up with it. And of course all of those entitlement programs that buy the votes to keep the lawyers in office are financed by, you guessed it, your money/TAXES! Why not only do they spend your money on whatever THEY CHOOSE, they even go beyond that! Yes, they print more money and spend money they don't have and then hand YOU the bill! maybe this little image will come to mind:

You have to give the devil it's due. They have been successful at picking the pockets of the American people without the people even knowing whose doing it! That's right. The American people blame it on 'the system, or the politicians etc. But the reality is:

You can call them anything you like. Call them Republicans, Democrats, Progressives, Independents, Politicians, Judges, Congressman, Senators, Legislators, Public Servants, etc. But the one fact and common denominator remains; they are all (with few exceptions) **LAWYERS!**

Anyway you do the math. America is now ruled 100% by **LAWYERS!**
